

DECOMATE II Project

The Telematics for Libraries funded project DECOMATE II: *Developing the European digital library for economics*, finished its specification phase in August 1998. The following reports are available to the public in electronic form (HTML, PDF) at the project's web address:

<<http://www.bib.uab.es/decomate2>>.

- *Analysis of digital resources.* This report outlines the digital resources available at the local sites of the project participants, including an analysis of these resources and their suitability to the development of the project.
- *Scope of DECOMATE II contents.* The report identifies the type of materials and resources to be included in the service, and includes a short study on its main characteristics in view of potential problem areas that can be encountered.
- *User study design.* The report outlines the methodology to be used to gather qualitative and quantitative feedback, and outlines a preliminary timetable for the user study.

- *User requirements, system architecture and conceptual design.* This report describes the user requirements and contains the description of the system environment and conceptual design of the system.
